Environmental Policy for B. Braun Medical Ltd

SA-GB02-G-6-4-20-500-01-A-EN
Valid From 09.10.2026
Version 11.0

B. Braun Medical Limited is an environmentally conscious company and as such, we recognise the potential environmental impact that our operations may have on the environment.

With our constantly growing portfolio of effective medical care solutions, B. Braun makes a substantial contribution towards protecting and improving people's health. By offering supplementary services and consulting, B. Braun is a system supplier that develops the best solution for patients in close partnership with our customers, making a significant contribution to medical advancements.

B. Braun Medical Limited are committed to the protection of the environment and fulfilment of environmental compliance obligations. This environmental policy provides a framework for continual improvement within the Environmental Management System which will be used to establish and enhance environmental performance, implement, maintain, and continually improve, including the processes needed and interactions, in accordance with the requirements of, ISO 14001:2015 Environmental Management Systems – Requirements, ISO 9001:2015 - Quality Management Systems -Requirements and ISO 13485:2016 Medical Devices - Quality Management Systems -Requirements and ISO 45001:2018 Occupational Health & Safety Management System – Requirements, held within an Integrated Management System.

We will set environmental objectives, conduct system reviews, introduce improvement activities, and report our performance internally. Communication to and training of our employees will ensure they understand the meaning and importance of this policy.

We will commit to:

- The prevention of pollution through training and awareness.
- We will prevent, re-use, recycle waste where possible and commit to not send any general waste to landfill.
- We will check compliance to the waste hierarchy/legislation through internal audits and mapping our waste streams.
- Reduce gross Scope 1, 2 and 3 Greenhouse Gas emissions as detailed in our associated Energy & Greenhouse Gas Policy.
- Monitor water consumption at all sites (water is not used in production activities).
- For products the UK manufactures' we will carry out an environmental product life cycle assessment, within the design process, looking for ways to lessen/improve our environmental impact.

Our commitments will be achieved through specific targets:

- Reduce energy consumption as detailed in our associated Energy & Greenhouse Gas Policy.
- Ensure that recycling activities are carried out in 100% of all areas, through internal audits.
- Use a dedicated environmental team has been appointed by management.
- Update the policy, regularly by the environmental team, and all changes will be communicated to interested parties.
- Questions regarding these commitments and targets should be directed to the Environmental Manager.

This policy can be found within our internal IMS (Integrated Management System), section 6-4, and displayed on main internal notice boards and within our external website B. Braun UK Policies & Statements, where other policies can be found. The policy is regularly reviewed and where necessary updated by the environmental team and all changes will be communicated to interested parties and employees.

Craig Cannings
