

B. Braun Medical Limited has been associated with the manufacture and provision of healthcare products and services for over 150 years. The Company Brands have worldwide reputations for quality, innovation and service. The Company strives to deliver products and services on a right first time basis and to deliver these products in a timely manner providing a service commensurate with the Company's reputation.

The Company achieves this objective of providing its customers with well designed products and services to the required quality standards, by employing customer led marketing techniques to bring products to the market. The technical, aesthetic and performance requirements of such products shall be assured by the application of modern design, manufacturing and quality methods. The Quality Management System is accredited to ISO13485: 2016 and ISO 9001:2015 standards, and complies with the European Directives 92/25/EEC and 93/42/EEC.

The continuing achievement of quality goals in the ever changing and competitive environment of worldwide medical technology requires implementation of the concept of continual improvement. This is delivered through the provision of appropriate training in conjunction with a belief and pride in excellence instilled in all our employees. This initiative requires the active involvement of senior management in ongoing reviews of both product and service quality, and the maintenance and effectiveness of the Quality Management System.

A system of regular planned Internal Quality Audits is operated, which identifies opportunities for improvement and which ensures that such improvements are implemented by means of appropriate and effective corrective and/or preventive action.
