IryPump® S

Colostomy Irrigation – Step by Step Guide

Turn on the IryPump® S to check if the battery is properly charged.

Ring is red = IryPump® S needs charging. Ring is green = ok to begin irrigation.

Remove the water container from the pump module by pressing the side release button.

Extend the water container. Pull the inner section up until it audibly clicks into position.

Fill the water container with the advised amount of water. Temperature between 36°C and 38°C.

Attach the filled water container back onto the pump module.

Use the quick connector to fasten the tubing system onto the pump.

Connect the other end of the tubing system to the cone.

Remove your stoma pouch and attach an IrySleeve® irrigation sleeve to your stoma.

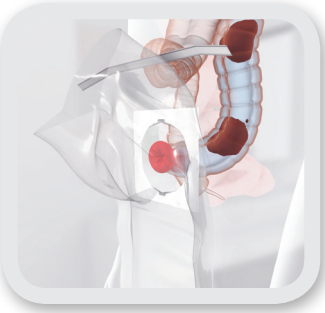
tip!

Let the lower end of the irrigation sleeve hang over the toilet.

Expel all air from the tube by turning the control wheel to level 3. Then turn off again.

Lubricate the cone and guide it into your stoma through the upper opening of the sleeve.

If water does not flow, try reinserting the cone. A pre-rinse using 150ml of water can help achieve a more effective result.



Once the water has flowed in, turn the IryPump® S off and wait 2 to 3 minutes before removing the cone.

Fold up the sleeve. The 2 sleeve edges should be side by side.

Start closing the sleeve by rolling back the clamp. The clamp should be rolled 3 times.

Close the sleeve by pressing the clamp edges. Make sure the clamp is in place.

Once the evacuation starts, reopen the sleeve and hang it over the toilet.

When irrigation is complete, dispose of your irrigation sleeve in the household waste.

Clean your IryPump® S system with warm soapy water, then dry it and recharge if necessary.

IryPump® S Set	Quantity	REF
Complete starter set, contains ▪ IryPump® S (electrical pump, water container and power supply) ▪ IryCone®+ (cone and tubing) ▪ IrySleeve® Irrigation Sleeves 60 mm ▪ Iryflex® Faceplate ▪ B. Braun StomaCare Belt ▪ Iryfix® ▪ B. Braun Petite ▪ Softima® Active Mini ▪ Carrying case	1 set	29120E
